

*"Take the **guesswork** out of **dirtwork!**"*

Disclaimer

- **DirtLogic (DL) take-offs are created as per the grading plans during estimating phase of this project. If a Geotech report is available DL will use it to verify Clear and Grubbing depths.**
- DirtLogic runs it's take-offs to the **bottom of rock, not the bottom of structural fill unless otherwise noted in this report.**
- **Please note** that variations in graphical representations may have been employed to promote clarity of the plans. Variations may include the size, location, orientation or omission of various plan entities. Anyone using this information should verify conformance to the approved plans, details, specifications and any subsequent revisions thereto. The user accepts all responsibility for the use and/or propagation of this information.
- **Lengths, Counts, Areas and Depths herein**, are taken from Engineer produced drawings and are not produced in our office or by our employees. However, we do our best to search out any errors that might occur but don't guarantee that there aren't any. We note any assumptions that might be made by us due to lack of information provided. The information DL provides in these reports is only as good as the information DL is provided with. DL is not responsible for changes made during construction that differ from plans used during the estimating phase of this project unless otherwise noted in this report.
- **Quality Assurance** measures are taken very seriously here using Proprietary software developed by DirtLogic, LLC. and are only proven to work within our defined scope of work; **being within the limits of grading only.** Takeoff software cannot calculate anything outside of that defined scope, so we can't insure that any quantities given outside of that scope will be correct and accounted for. Any quantities that might be included outside of our scope are given as a convenience, and should be verified before use as we don't always have all project specifications and are limited to what has been supplied to us by the client or Engineer.
- The **CUSTOMER** is advised to check all electronic media for computer viruses before loading the files. The customer is fully responsible for intercepting and disabling viruses, if any, that may be inadvertently transmitted with the electronic files and hereby agrees to indemnify and hold DirtLogic, LLC. Harmless from and against all claims of any type or nature asserted by customer or any party as a result of viruses inadvertently transmitted with the electronic files.

What is a Breakdown Report?

A breakdown report is a report of the total compilation of all the information that has been imputed into the our earthwork-engineering programs.

- A. This is the total square foot area of the regions. (Regions are individual features i.e. Roads, Sidewalks, Buildings, etc. these are used to quantify areas and to find sub-grade)
- B. This shows how much of that region's total square foot area is in a cut and how much is in a fill.
- C. This identifies the cubic yardage of cut/fill that lies within those regions.
- D. This is the fill ratio that can be added to the fill quantity upon request for figuring dirt expansion.
- E. This is the total cubic yardage of export/import that lies within a specific region.
- F. This is the cubic yardage change per raising/lowering the regions or the entire site .1 ft. (useful for developing a balanced site)
- G. This is the Subtotal of all the regions combined.
- H. The unspecified is all the area that does not lie within a specified region, but is still part of the job.
- I. This is the subtotal of the regions and the unspecified combined. It is the overall quantities for the entire job.
- J. This includes the name, depth, area, and cubic yardage of site strippings.
- K. This is the breakdown of the regions, which gives the thickness of the section to sub-grade, the area of the region, and the volume of material that lies within that region.
- L. This is the actual area, taking into account slopes.

DIRTLOGIC^{LLC}

"Take the guesswork out of dirtwork"

PROSPERITY VILLAGE

Balance Summary

Volumes:

Total Cut	85,521.00 CY
Total Fill	75,592.00 CY
Export	9,929.00 CY
Per 1/10 of a foot change	5,297.00 CY

Prepared By

DirtLogic, LLC.
T: 1.877.775.6442

QUANTITY SUMMARY

Site Summary

Area:

Total SF	1,431,701.00 SF
Cut SF	663,465.00 SF
Fill SF	727,482.00 SF
On Grade SF	40,754.00 SF
Stripping Region SF	1,438,391.00 SF

** Balance Summary

Volumes:

Total Cut	85,521.00 CY
Total Fill	75,592.00 CY
Export	9,929.00 CY
Per 1/10 of a foot change	5,297.00 CY

Existing Site Preparation: Clearing, Stripping, Demolition

Volume:

6" Strip @	6" Depth	23,553.00 CY
AC Demo @	3" Depth	159.00 CY
Concrete Demo @	4" Depth	6.00 CY
Previously Stripped @	0" Depth	0.00 CY
Total Strip =		23,718.00 CY

Notes

- All Paving Sections are figured to back of Curb
- The Scale that this plan was scaled at was Electronic
- Strippings- Assumed Areas as per plan
- Anyone using this report should verify all Sectional Depths & Assumptions
- * Stripping Quantities are not included in the Total Cut Volumes above and should be treated as separate quantities
- ** No compaction factor, shrink or swell conversions were taken into account in these calculations

Exclusions

- Footing Excavation
- Trench Spoils

Q.C. CHECKLIST

Here is a series of checks we have run that you can also use.

Title Page:

- Project name is correct and descriptive
- Spelling of Project name is correct
- Date is correct

Summary:

- Project name matches name on Title Page
- Quantities in the Site Summary, Site Strippings and Balance Summary compare to the Job Total on the Volume Report
- Stripping depths are correct and Named appropriately
- Additional Notes are correctly documented

Material Areas (Summary page 2):

- Naming Scheme complies to **DirtLogic Standards**
- Sectional Depths are correct and the Section Breakout equates to total Sectional Depth listed
- Material Types are correctly listed along the Section Breakout
- Slope Areas and Volumes compare to the Volume Report
- All Exclusions and Notes are listed correctly (if any)

Volume Report:

- Surface Comparison is correct for this particular project's needs
- Project Name matches name on Title Page
- Units are correct
- Date is correct
- No Negatives or 0's are found throughout entire Volume Report were they shouldn't be
- Regions Total S.F. should be relatively close in comparison to the Sections Total S.F.
- Naming Scheme complies to **DirtLogic Standards**
- Sectional Depths are consistent throughout

Sectional Area Layout:

- Legend Hatch Type compares to AreaHatch Types
- Scale and North Arrow are correct
- Project name matches name on Title Page

Cut/Fill Grid Map/3D Views:

- Layout complies to **DirtLogic Standards**
- Project Name matches name on Title Page
- Building Pad/s is flat across entire area
- No unusual Cut/Fill Depths are shown

Electronic Files:

- Compare Agtek files, AutoCAD Files and Plan Sheets for discrepancies
- Terrain Modeling is clean and complete in Design and Existing Surface (Walls, Pads, Curbs, etc.)
- Project Daylights at Perimeter where it is supposed to
- No Over-Lapping Regions (Alt+F)
- "Follow Up"**

Technician:

Initial A.I.

Date 7/29/2015
